

Manuscript Submission to “L’Energia Elettrica *Supplement Journal*”

Publishing your research article in AEIT L’Energia Elettrica *Supplement Journal* is simple and immediate. Just send your word file to elettrica@aeit.it .

Manuscript Preparation

Manuscript length should be 6 to 16 pages. All submitted manuscripts must include the following items:

Title - Make sure that the title is specific and concise. Titles should be presented in title case - all words except the first word should be in lower case letters.

List of authors, their affiliations and email addresses - Provide the full names and affiliations of all the authors. Affiliations should include department, university or organization, city, and country. One of the authors should be designated as the corresponding author, and their email address needs to be included.

Abstract - The abstract should briefly introduce the manuscript, not exceeding 400 words. No citations should be included in the abstract.

Keywords - At least 3 keywords should be included and must be separated by commas to distinguish them.

Introduction - The introduction section should provide a context for your manuscript. When preparing the introduction, please bear in mind that some readers will not be experts in your field of research.

Main body - the main body part should include the main proposed ideas, results and discussions.

Conclusions - A conclusion is where you summarize the paper's findings and generalize their importance, discuss ambiguous data, and recommend further research. An effective conclusion should provide closure for a paper, leaving the reader feeling satisfied that the concepts have been fully explained.

Acknowledgments - You as the author are free to decide whether to include acknowledgments or not. Usually, the acknowledgments section includes the names of people who in some way contributed to the work, but do not fit the criteria to be listed as the authors. This section of your manuscript can also include information about funding sources.

References- Science Publishing Group uses the numbered citation method for reference formatting, with sequential numbering in the text, and respective ordering in a list at the end of the paper.

The list should contain at least ten references and should be arranged in the order of citation in text. List only one reference per reference number. In the text, each reference number should be enclosed by square brackets. Citations of references may be given simply as "in [1] ...", or as "in reference [1] ...". Similarly, it is not necessary to mention the authors of a reference, unless the mention is relevant to the text.

Multiple citations within a single set of brackets should be separated by commas. Where there are three or more sequential citations, they should be given as a range [2, 7-9, 13].

For any doubts or need for indications in the composition of the final article, refer to the template reported on this site (<https://energiaelettrica.aeit.it/info/template.docx>).

Word Processing Formats

Before submission, please ensure that your articles are in the form of Microsoft word 2000/2003(doc) or Microsoft word 2007/2010(docx). These two forms of the articles are acceptable for AEIT L'Energia Elettrica *Supplement Journal*.

Publication Presentation

After publishing in L'Energia Elettrica *Supplement* (open access journal), your article will be presented in the form of PDF.

Article Processing Charges

Traditional journals are solely based on a reader-pays model, in which institutional libraries typically pay for the access to content. However, AEIT L'Energia Elettrica *Supplement Journal* are full open access. The scientific community and general public can access all articles published in the journal for free.

This means that AEIT does not gain any income through selling subscriptions of the printed or online versions of the published articles. Therefore, by collecting Article Processing Charges from authors' AEIT is able to cover the various publishing services:

- Editorial work: peer review, administrative support, commissioning content, journal development.
- Technical infrastructure and innovation: development, maintenance and operation of online journal system and websites.
- Production of articles: formatting and mark-up of articles and inclusion in indexing services.
- Customer service: responding to authors and readers.

AEIT L'Energia Elettrica Supplement is an Open Access journal accessible for free on the Internet. With Open Access, AEIT allows us to distribute knowledge more widely and at a lower cost than was previously possible.

However, to cover the editorial services and production of an article, the supplement journal depends on Article Processing Charges (APC).

The Article Processing Charge for the journal is 400 € for AEIT members and 500 € for non-members.

The corresponding author needs to arrange payment of the Article Processing Charges. Following peer review, once a manuscript has received editorial acceptance in principle, the Article Processing Charges becomes payable and the formatting checks on the manuscript will

commence. Once formatting checks are completed, and payment of the Article Processing Charges has been received, the article will be published.

AEIT currently supports the following payment methods:

- Wire transfer.

Ethic Behavior

For all parties involved in the process of publishing (authors, Editorial Board, and reviewers), it is necessary to agree upon standards of expected ethical behavior. To guarantee high ethical standards, AEIT refer to international standards for all the parties. AEIT expects all the parties to commit to these standards.

All authors who submit to AEIT Journals are supposed to observe the international standards for authors voluntarily.

- Authors must certify that their manuscripts are their original work. Plagiarism, Duplicate, Data Fabrication and Falsification, and Redundant Publications are forbidden.
- Authors must certify that the manuscript has not previously been published and is not currently being considered for publication elsewhere.
- If the authors have used the work and/or words of others, the authors must ensure that the work and/or words of others are appropriately cited or quoted and identify all sources used in the creation of their manuscripts.
- When an author discovers a significant error or inaccuracy in his/her own published work, it is the author's obligation to promptly notify the Journal editor or publisher and cooperate with the editor to retract or correct the paper.

Editors and Editorial Board are required to follow the international standards for Editorial Board:

- The Editorial Board must keep information pertaining to all submitted manuscripts confidential.
The Editorial Board is responsible for making publication decisions for submitted manuscripts.
- The editorial committee will ensure that the needs of readers and authors are met.
- The Editorial Board will evaluate manuscripts only for their intellectual content.
- The Editorial Board must always be willing to publish corrections, clarifications, retractions and apologies when needed.

International Standards for Reviewers:

Reviewers of *L'Energia Elettrica Supplement Journal* are also expected to meet the international standards for reviewers when they accept review invitations.

- Reviewers must keep information pertaining to the manuscript confidential.
- Reviewers must bring to the attention of the Editor Board any information that may be a reason to reject publication of a manuscript.
- Reviewers must evaluate manuscripts only for their intellectual content.
- Reviewers must objectively evaluate the manuscripts based only on their originality, significance and relevance to the domains of the journal.

Copyright

Authors retain ownership of the copyright for their publications, but grant AEIT a non-exclusive license to publish the work in paper form and allow anyone to reuse, distribute and reproduce the content as long as the original work is properly cited. Appropriate attribution can be provided by simply citing the original work. No permission is required from the authors or the publishers. For any reuse or distribution of a work, users must also make clear the terms under which the work was published.

Open Access benefits

Open Access is the practice of providing unrestricted access via the Internet to peer-reviewed scholarly journal articles. By making information freely available in this way, Open Access accelerates research and learning. By reducing the barriers that restrict access to knowledge, Open Access maximizes the opportunity for publications to be read and for authors to be recognized for their contribution in their chosen field and beyond.
